

Quality Policy

ATI consultores brings extensive experience in activities of civil, electrical and mechanical engineering and architecture projects, as well as financial and feasibility consultancy , offering a cohesive team of engineers and technicians organized around each project according to its specific needs.

ATI is committed to meet and exceed customers expectations by dynamically adapting to changes, proposing solutions in a positive way as well as statutory and regulatory requirements.

The company's philosophy is to give the best from everyone, questioning every single output from anyone and favoring debate among all members of a team, regardless their position in the company. ATI firmly believes that open and bold discussions, without prejudices, are a key element in adding value to a project.

ATI hires motivated, committed and involved people who contribute with their knowledge in a proactive manner to the customer's satisfaction.

ATI supports its Quality Policy with a management system that meets ISO 9001 requirements and continually improves the system efficiency.

This policy is the framework under which Management defines the annual objectives.

It is reviewed periodically to keep its validity and effectiveness afresh.
